

How it works

1. Purchase a coupon for a **Qualitative** or **Quantitative** analysis
In the list below, you can see which steroids can be analyzed **qualitatively** or **quantitatively**.
2. The sample you send needs to be **at least** 100 milligrams (0,1 gram) or 100 microliters (0,1 ml)
For pills this is the weight of the pill itself not just the weight of the active substances in the pill. *For example, a pill of Oxandrolone which has 10 mg of Oxandrolone, but it weighs 100 mg then just 1 pill is enough.*
3. Please use proper containers for transport of the steroids. **Please do not use syringes as they will leak during transport and can seriously affect the results of the analysis.**
For example, use ampoules, vials and other suitable liquid containers.
Uncapped needles will be rejected! As this is a serious hazard for our lab personnel.
4. Fill in the suspected substance # (number) of the substance you suspect to be in your sample on the coupon. You can only suggest 4 suspected substances otherwise the analysis will be invalid.
5. Also write down any other remarks/concerns on the coupon if you have any, but **do not** mention in any case the name steroids or other names that may alarm / red flag customs.
5. **Fill in your (valid) email address.**
We send the analysis results to this address so make sure it is a valid email address and it is written down clearly.
6. Pack your sample with the coupon but **do not send this page** with the package.
Be sure to only send one sample per package and one coupon.
If you have more than one sample, make sure each sample is packaged separately with a coupon.
These separate packed samples can be send in one larger envelope.
Also, don't forget to write down which sample has which coupon number, so you can interpret the results.
7. Send us the sample you want to be tested. Send the package to:
Attn: Lab Analysis
Street address: Frankenthalerstraat 18
ZIP code + City: 4816 KA Breda
Country: The Netherlands

On commercial/shipping invoice state that the package contains Lab/Laboratory sample(s).

On the next page you see a list of steroids, their suspected substance number (#), and the available analysis type(s). Use this list to specify the suspected substance(s) on your coupon.

DO NOT write the actual substance name on the coupon and use only the substance #!

Disclaimer:

Transportation is at own risk. We have no responsibility to any loss of sample during transport. Make sure your email address is valid and filled in clearly. We do not give refunds. All coupons can only be used once. When trying to use a code twice the second sample will be denied, and it won't be sent back. Note that the sample you send will be used in an analysis and will not be returned.

Do not include this page in your package!

| Substance | Code | Other names |
|---|---------------|---|
| Boldenone Undecylenate | BOLUN | Parenabol, vebonol |
| Chlorodehydrotestosteron | CHTEST | Oral Turinabol |
| Drostanolone Enanthate | DROEN | Masteron Enanthate |
| Drostanolone Propionate | DROPR | Blackburn Compound, Emdisterone, Masteron Propionate |
| Fluoxymesterone | FLUME | Halotestin, Androfluorene |
| Mesterolone (Proviron) | MESTE | Proviron, Androviron, Mesteranum, Testiwop |
| Methandrostenolone | MEDRO | Dianabol, Metanabol, Nerobol, Methandienone |
| Methasterone | METHA | Superdrol |
| Metenolone Acetate | METAC | Primonolan acetate, Nibal |
| Metenolone Enanthate | METEN | Primobolan Enanthate |
| Methylnortestosterone | METNT | Normethandrone, Metribolone |
| Metribolone | METRB | R1881, Methyltrienolone |
| Nandrolone Decanoate | NADEC | Retabolil, Deca-Durabol, Deca-Hybolin |
| Nandrolone Phenylpropionate | NANPH | Durabolin, Fenobolin, Nerobolin, Activin |
| Oxandrolone | OXAND | Anavar, Oxandrin, Provitar, Vasorome |
| Oxymetholone | OXYME | Anasterone, Synasteron, Anadrol, Anapolon |
| Testosterone Cypionate | TESCY | Depovirin |
| Testosterone Decanoate | TESDE | Testocaps |
| Testosterone Enanthate | TESTEN | Andropository, Testostroval, Adrotardyl, Atlates, Durathate |
| Testosterone Isocaproate | TESTIS | Sustanon 250, Omnadren 250, testosterone 4-methylvalerate |
| Testosterone Phenylpropionate | TESTPH | Retandrol, Testosterone hydrocinnamate |
| Trenbolone Acetate | TREAC | Finaplix |
| Trenbolone Cyclohexylmethylcarbonate | TRECY | Parabolan |
| Trenbolone Enanthate | TREEN | Trenabol |
